HotSpot im ICE – die beste Verbindung von Mobilität und Internet

Rollende Büros mit WLAN-Zugang in der 1. Klasse im ICE gratis

In Zusammenarbeit mit der Telekom ermöglicht die Deutsche Bahn einen ganz besonderen Service. Ganz nach dem Motto „Reisezeit ist Nutzzeit“ können Sie sich in den DB Lounges und während der Fahrt in vielen ICE-Zügen in der 1. und 2. Klasse mit einem WLAN-fähigen Endgerät (z. B. Notebook, Smartphone oder Tablet) über den HotSpot der Telekom drahtlos ins Internet einloggen – und das sogar bei bis zu 300 km/h.

Welcome for URL /

You've requested Mo Cuishle - a proxy server for offline use. If the network settings of your browser points to it, all web pages you've seen on the Internet will be available to read them without having to remain connected. By default the mode is automatic depending the state of the network interfaces.

Mo Cuishle provides your [browse](#) history of hosts and pages, ordered by the last access, and an [outgoing](#) history of the pages you've requested offline, to open it later while online.

A full text [search](#) over the cached web sites is included. You can query the contents in the whole cache or filtered by host path, after rebuilding the index.

The hosts requested in the last minute are listed always on top, and you can decide to block or unblock addresses on the fly.

The name Mo Cuishle is inspired by a movie - from [Wikipedia](#): «Mo Chuisle (spelled incorrectly in the film as "mo cuishle"): Irish for "my darling, and my blood" (literally, "my pulse")».

[browse outgoing](#) Mo Cuishle
